We are informing you about the convention arranged by our society on the subject of sectarian violence and discrimination. We need your full support and help for sorting out this crucial matter which is destroying the image of our country and Islam in the international community. No further foreign investments are taking place in Pakistan due to social instability. Tourism, which can be a major industry, is also being affected.

The Ulema of the three sects who have been contacted are convinced and are ready to deliver the peace message to people and negotiate with all other sects to end their sectarian differences. There is a possibility that they may start using their energies for the uplift of our country. We are contacting the rest of the sects to join us in this mission.

Objective of Convention:

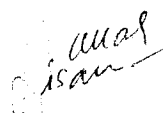

To inculcate patience, tolerance and brotherhood among the followers of all the sects and different factions of our society. Channeling of the talented youth for the uplift and development of the country.
